

YEAR 9 AND YEAR 10 ELECTIVE

Computing Technology Stage 5

Design. Code. Build. Create.

Build websites, games, apps, robots and digital systems while learning the skills behind the technology you use every day.

WHY CHOOSE IT?

Creative projects, future skills, real technology.

A strong fit if you like making things, solving problems or exploring how tech works.

What you will explore

01 Web Development

Plan, design, style and publish interactive websites.

HTML

CSS

JavaScript

02 Game Development

Create playable experiences with mechanics, scoring and testing.

Sprites

Levels

Logic

03 Mechatronics

Connect hardware and software to make smart systems.

Sensors

Motors

Circuits

04 Python and Apps

Use programming logic to solve problems and design app ideas.

Python

Loops

Debugging

Make technology you can show.

Websites. Games. Apps. Smart systems.

```
build.website()  
game.update()  
robot.sense()
```
